ISPM-15 is a process in which pallets or wood lumber is heat treated to a core temperature of 56 degrees Celsius (133 F) for 30 minutes. This process eliminates the presence of pests found in wood 1. The heat treatment process can also be used for commercial processing to eliminate any pests found in wood, providing a warranty of 10 years on the fit-out works, but limited to terms and conditions 1.

We are a certified company through the Timber Products Inspection Program Our ISPM 15 heat-treated pallets are marked with an approved stamp, which means that your shipments will not be delayed at international ports due to ISPM 15 concerns This certification ensures that our wood packaging material complies with the international standards and regulations set by ISPM 15
